MENTAL STATUS

Normal ambulatory status. patient was with friends at a party. She had been drinking and passed out. A friend walked into a room and found the patient passed out, her pants were down. There was a male with her that had his pants down and she observed him moving his hips against her groin. She got the patient out of the house. patient awakened after she was travelling in her friend's car. She states that she (her body) does not feel like she has had sex, but wants to be checked for signs of possible sexual activity. The doctor and I spoke with her at length ab, but patient did not wish to have a rape kit done/ Alert, oriented and fully verbal. (KK3) 10/16/2016 05:17
